Mobile: +91-7601022993

Location: Amaravati, Andhra Pradesh

## SKILLS SUMMARY

- **Languages:** C++, C, Python, Java, HTML, CSS, JavaScript, PHP
- **Frontend:** React.js, Tailwind CSS, Bootstrap, Streamlit
- **Backend:** Node.js, Express.js, MongoDB, MySQL
- **Tools:** Git, GitHub, VS Code

## EDUCATION

- **SRM University** Andhra Pradesh, India  
*Bachelor of Technology - Computer Science and Engineering; CGPA: 9.43/10 (Ongoing)* Aug 2023 – May 2027
- **Sri Chaitanya College** Guntur, AP  
*Intermediate; Percentage: 98.1%* June 2021 – March 2023
- **Sri Chaitanya School** Amaravati, AP  
*Class X (SSC); Percentage: 100%* April 2020 – June 2021

## RELEVANT COURSEWORK

Data Structures and Algorithms   Object-Oriented Programming   Database Management Systems   Operating Systems  
Computer Networks   Machine Learning   Artificial Intelligence   Web Technologies

## EXPERIENCE

- **HCLTech** Remote  
*AI/ML Intern (Certificate)* June 2025 – Aug 2025
  - Built an AI summarization tool that generates both short and detailed summaries from text using **BART** and **Sentence Transformers** with **XGBoost**.
  - Extended the tool to handle multiple input types — YouTube videos (via **Whisper** and **yt-dlp**), PDFs, and Word documents (via **PDFPlumber** and **PyMuPDF**).
  - Evaluated the performance of the generated summaries using standard evaluation metrics like ROUGE to ensure accuracy and high readability.
- **Social Winter of Code (SWOC)** Remote  
*Open Source Contributor (Certificate)* Jan 2026 – March 2026
  - Contributed to open-source projects by fixing bugs, adding features, and improving code quality.
  - Worked with a global developer community using **Git** and **GitHub** for version control and code reviews.
  - Collaborated with peer developers and project maintainers to resolve code integration conflicts and conduct peer review sessions.
- **Edunet Foundation** Remote  
*Full Stack Development Intern (Certificate)* June 2025 – Aug 2025
  - Built a donation platform using the **MERN stack** that allows users to share and exchange household items.
  - Implemented user authentication, image uploads via **Cloudinary**, and **RESTful APIs** for backend communication.
  - Designed an interactive impact-tracking dashboard showing users the environmental metrics and waste reduced by shared items.

## PROJECTS

- **Neighborhood Resource Exchange Platform** GitHub Link  
*React, Node.js, Socket.io, MongoDB*
  - Built a community platform for item sharing with real-time messaging using **Socket.io**.
  - Implemented JWT-based user authentication, item management, and image uploads via **Cloudinary**.
  - Designed a responsive UI using **React/Vite** and **Tailwind CSS** for a smooth user experience.
  - Developed an admin dashboard to moderate item listings, manage user accounts, and ensure platform security.
- **2D Platformer Game** GitHub Link  
*Python, Pygame*
  - Developed a 2D game with player movement, jumping, and enemy interactions across multiple levels.
  - Implemented collision detection, score tracking, and increasing difficulty as the player progresses.
  - Added game states for start screen, gameplay, and game-over screen to give users a complete game experience.
  - Programmed a local high-score persistence system using file handling to save player stats across sessions.
- **OS Task Manager** GitHub Link  
*Java, Java Swing*
  - Developed a desktop system utility in **Java** using **Swing** to monitor running operating system processes.

- Fetched real-time process details such as PIDs, CPU usage, and memory footprints by querying system commands natively.
  - Designed an interactive graphical user interface featuring tabular data with sorting and searching capabilities.
  - Programmed a process termination feature with safety warnings to prevent accidental termination of critical system processes.
- **Entertainia** GitHub Link  
*HTML, CSS, JavaScript, PHP, MySQL*
    - Developed a dynamic entertainment website featuring music and cartoon content with structured navigation.
    - Implemented secure session-based user authentication and access controls using **PHP**.
    - Designed a clean and responsive user interface using **HTML**, **CSS**, and **JavaScript** for seamless navigation.
    - Managed data storage and optimized backend database queries using **MySQL** to ensure quick content retrieval.
  - **Hotel Booking System** GitHub Link  
*React.js, JSON Server, Axios, Context API*
    - Built a user-friendly frontend for an online hotel reservation platform using reusable **React.js** components.
    - Implemented user authentication and session state management using the **React Context API**.
    - Integrated **Axios** to handle RESTful API communication and data exchange with a mock backend powered by **JSON Server**.
    - Developed features for room search, check-in/out form validation, dynamic price calculations, and real-time Toast notifications.

## CERTIFICATIONS

---

- Oracle Certified Professional: Java SE-17 Developer Certificate Link
- MongoDB Certified Associate Developer Certificate Link
- HackVerse Hackathon Certificate Link
